

AEM 341 Problem Set #1

Due: 17th Jan 2017

1. Go to <http://www.aryjglantz.com/> and read and watch **some, but not all**, of the construction of a composite experimental civilian sport aircraft.
2. Write 341 words about specific topics/technologies that you learned from #1. Including photos or drawings are ok, but don't spend too much time creating or formatting this paper.
3. At the end of this class, you will be able to understand and analyze the major structural components in the sort of aerospace vehicle in #1. Give a list of 3 aerospace structures topics that **you** are interested in or want to know more about.
4. Are you more interested in spacecraft or aircraft?
